- HTML5, CSS3, Javascript (ES6), ReactJs, Bootstrap
- JSP, JSTL

Backend

- PHP, Laravel
- Java, Servlet

Database

- MySQL
- Microsoft SQL Server

LANGUAGE

English

ABOUT ME

- Pleased to meet you! I am a student majoring in Software Engineering at FPT University. As an aspiring programmer, I am actively seeking an internship opportunity with your project. With a solid foundation in programming, I have chosen the programming languages that I am most passionate about. In the Backend realm, I currently focusing on learning the PHP programming language and the Laravel framework, while in Frontend, ReactJs is the technology I aspire to utilize to create the best user experiences.

- My goal in joining your OJT project is to learn and apply my knowledge to contribute to the project's development. I am eager to have practical opportunities to enhance my skills and become an integral part of your team.

PROJECTS

Manga Universe
- An online manga reading platform that allows users to explore and enjoy a wide variety of manga.

Cellphone Store
- An e-commerce platform specializing in selling high-quality smartphones.
